At the Institute of Linguistics/English we are

Looking for

*Student assistant (d/w/m)

with experience in R*

24 hours/month

Responsibilities:

- Organize tutorial for the course “Introduction to statistical data analysis”.
- Explain R programming and statistical concepts, answer students’ R questions.
- Check solutions and provide basic feedback.

We will work with the book “Regression and other stories” by Andrew Gelman, Jenifer Hill, Aki Vehtari (2020).

Prerequisites:

- Solid understanding of the R programming language.
- Familiarity with basic statistics (e.g. linear regression) or willingness to obtain it.
- Familiarity with RStudio or willingness to obtain it.
- Fluent in English.

Start: April or soon thereafter
Duration: 4 months
Hours: 24h/month (= 6h/week)
